PROFESSIONAL SUMMARY

Final year B.Tech student with strong numerical and logical capabilities, specializing in Data Science and Automation. Demonstrated ability to quickly adapt to new technologies and apply innovative problem-solving skills to real-world challenges. Committed to building secure, user-centric solutions with a focus on risk mitigation and data integrity. Eager to leverage analytical skills in a collaborative, continuous-learning environment.

TECHNICAL SKILLS & TOOLS

Analytical & Logic: Python (Data Analysis), SQL (MySQL, PostgreSQL), Java, Algorithms
Data & Frameworks: Pandas, Scikit-learn, TensorFlow, Selenium (Automation)
Development Tools: Git (Version Control), Linux, Figma (Prototyping), Docker
Core Competencies: Risk Detection Models, Process Automation, User Experience (UX), Logical Problem Solving

EXPERIENCE

BluBridge Technologies *July 2025 – October 2025*
AI Research Intern

- Collaborated with a 3-person research team to optimize model performance, demonstrating adaptability by rapidly learning quantization techniques for 32B parameter models.
- Contributed to the project lifecycle by implementing weight reduction strategies, ensuring technical objectives were met within agreed timelines.

KEY PROJECTS

Java Code Vulnerability Classifier *View Project*
Risk Management & AI | Hugging Face

- Developed a predictive model to identify security flaws in software, achieving **90% accuracy** in vulnerability detection to directly support risk mitigation practices in development workflows.
- Ensured data integrity by standardizing diverse datasets into a unified JSONL format, facilitating robust and logical model training.

Fitcheck (Outfit Recommendation System) *View Project*
Customer Focus & Innovation | Hugging Face Spaces

- Demonstrated strong customer focus by designing an interactive Gradio interface that simplifies complex AI analysis for end-users, utilizing K-means clustering to deliver personalized recommendations.
- Applied innovative problem solving to handle diverse user-uploaded images by integrating DeepLabV3 for precise background removal and classification.

Quiz Wand *View Project*
Problem Solving & Automation | Firefox Add-ons

- Solved a user efficiency problem for educational environments by creating a cross-device browser extension that intelligently automates form interactions using Google Gemini API.
- Delivered a high-quality user experience ensuring compatibility across desktop and mobile platforms, prioritizing accessible design for a broad user base.

Unshorten Buddy *View Project*
Data Logic & Efficiency | GitHub

- Improved process efficiency by **90%** regarding link navigation time through the development of a logic-driven Telegram bot that validates and sanitizes URLs.
- Managed high-volume data requests within strict performance limits by architecting a reliable PostgreSQL database backend to ensure system availability.

EDUCATION

Dr. MGR Educational and Research Institute *Oct 2022 – Present*
B.Tech, Artificial Intelligence and Data Science

CGPA: 7.93 | **Relevant Coursework:** Big Data Analytics, Cloud Computing, Professional Ethics.

AWARDS & CERTIFICATIONS

- **IBM Certifications:** Business Intelligence (Data Logic), Cloud Application Developer, Java Fundamentals.
- **2nd Prize, Bug Bounty:** Techwoods'25 – Recognized for logical analysis and identifying critical system flaws.
- **4th Prize, Hackathon:** Hackatom – Awarded for innovative solution design and teamwork.
